EDUCATION

University of Lagos — Lagos, Nigeria
Bachelor of Science (B.Sc.), Biomedical Engineering (**CGPA: 4.13/5.00**) — **Expected 2027**

PROJECTS

MRI-Detect: Brain Tumor Classification Web App https://mridetect.streamlit.app — **2025**

- Developed a deep learning model using MobileNetV2 (TensorFlow/Keras) to classify brain MRI images into 4 categories.
- Trained on 7,000+ labeled MRI images with over 90% validation accuracy.
- Performed data preprocessing, cleaning, augmentation, and annotation for supervised training

Automatic Suction–Irrigation Device (ASID) for Neurosurgery — **2025**

- Co-developed an autonomous embedded fluid-management prototype integrating sensors and actuator control.
- Designed embedded control logic to maintain precision suction–irrigation balance in simulated neurosurgical environments.
- Integrated sensor data processing and control logic for real-time system response

SPECTRATHERM: Solar Hybrid Energy-Harvesting Smart Windows — **2024 - Present**

- Led development of an IoT-enabled energy system integrating environmental sensing and monitoring.

WORK EXPERIENCE

Reddington Multi-Specialist Hospital — Lagos, Nigeria
Biomedical Engineering Intern — **2026**

- Assisted biomedical engineers in the maintenance of medical equipment across multiple departments, reducing equipment downtime by 60%
- Supported equipment performance assessments and documentation to enhance operational reliability and ensure 100% regulatory compliance.

Lagos University Teaching Hospital (LUTH) — Lagos, Nigeria
Biomedical Engineering Intern — **2025**

- Assisted in functional testing, troubleshooting, and maintenance of medical equipment.
- Carried out monthly software checks on medical equipment, ensuring 100% software compatibility.

JTFL ECONOVA — Lagos, Nigeria
Co-Founder, Team Lead & Project Manager — **2023 - Present**

- Led a 4-member multidisciplinary team developing sustainable technology solutions.
- Secured over ₦5,000,000 in competitive innovation funding through successful grant and competition applications to AFRETEC and UNILAG OFF-BITE.
- Directed the development of award-winning engineering solutions in renewable energy and sustainable materials.

LEADERSHIP EXPERIENCE

Machine Learning Tutor, Biomedical Engineering Students' Association (BMESA) **2025 - Present**

- Tutored 20+ undergraduate students in machine learning and Python implementation through project-based learning sessions, tracking cohorts progress with a minimum of 88% per student.

NOTABLE ACHIEVEMENTS

- **Millennium Fellow, Class of 2026,** United Nations Academic Impact (UNAI) & Millennium Campus Network (MCN) **2026**
- **Scholar**, Nigeria Higher Education Foundation **2026**
- **Patent Holder**, SpectraTherm Smart Window System **2026**
- **Top Ranked Applicant,** IRENA Youth Forum **2026**
- **Distinction Candidate,** Biodesign & Innovation, UNILAG **2025**
- **Winner,** AFRETEC Energy Innovation Competition **2024**
- **Winner,** UNILAG Hult Prize On-Campus Competition **2024**
- **First Runner-Up,** UNILAG OFF-BITE 2.0 Innovation Competition **2024**
- **Second Runner-Up,** UI–UNILAG National Design Competition **2023**

SKILLS

Programming Languages	Python, MATLAB
Software & Tools	TensorFlow, Keras, Streamlit, Jupyter Notebook, Git/GitHub, Microsoft Office
Hard Skills	Machine Learning, Deep Learning, Data Preprocessing, Data Cleaning, Data Augmentation, Model Training & Evaluation, Computer Vision, Embedded Systems, Sensor Integration, Technical Documentation
Soft Skills	Project Management, Team Leadership, Problem Solving, Technical Communication, Public Speaking, Grant Writing, Teaching & Mentoring

PROFESSIONAL DEVELOPMENT / CERTIFICATIONS

- **Getting Started with Artificial Intelligence**, *IBM SkillsBuild*
- **AI Literacy**, *IBM SkillsBuild*
- **Python Programming**, *Kibo School of Technology (accredited by Woolf University, Germany)*
- **HSE Level 1 & 2 Certification**, *Deeprimex Consulting*
